

What is a Vehicle Risk Assessment?

An on-site review of your current corporate fleet operating policies. Then based on the findings, suggestions for improvements are made.

Introducing The MEARIE Group On-site Vehicle Risk Assessment Program

MEARIE is committed to risk management as a means of supporting you in the successful management of your operations. Additionally, good risk management practices prevent losses and protect the integrity of the reciprocal.

MEARIE's Risk Management Services offers value-added benefits that complement your own loss prevention and safety policies. Ask yourself a few questions:

- **Would you like to evolve your corporate fleet operating policies to industry best practices?**
- **Do you need help in performing a fleet audit?**

If you answered yes to either of these questions, then you should consider having MEARIE conduct a detailed evaluation of your current program.

MEARIE is pleased to introduce its new On-site Vehicle Risk Assessment Program. MEARIE will come to your facility, meet with your management team, review your current program related to Driver Selection, Driver Training, Vehicle Maintenance, and Accident Reporting. Then, based on the findings, a report is prepared and provided that includes an evaluation of your current practices and recommendations for improvement where needed. This service is being offered at no cost to MEARIE Vehicle Subscribers.

Be one of the first to take advantage of this new Risk Management program. To arrange for your Risk Assessment or if you would like further details, please contact Gary Durie, Risk Analyst, Underwriting & Risk Services at (905) 265-5355 or gdurie@mearie.ca
